Paired case errors across the four held-out cohorts
In-distribution · n=160
Family shift · n=80
Acquisition shift · n=80
Joint shift · n=160
Velocity RMSE
Empirical cumulative proportion
100.0% below 1
91.2% below 1
100.0% below 1
92.5% below 1
In-distribution · n=160
Family shift · n=80
Acquisition shift · n=80
Joint shift · n=160
Independent travel-time RMSE
Empirical cumulative proportion
85.0% below 1
71.2% below 1
73.8% below 1
62.5% below 1
